

1. (Currently Amended) A herbal applicator for the application of herbs that ~~is~~ are to be heated and generate a material-permeable vapor which is communicated applied directly on to the skin of the body ~~comprises~~ comprising:

~~of a flexible Main Housing~~ housing which can be easily attached on to ~~the~~ said body, ~~is affixed~~ said housing engaged with a flexible Heater Pad that connects to an electrical Power Source;

heat from said flexible heater pad regulatable by ~~to be regulated by~~ an adjustable Temperature Controller;

~~characterized in that the said flexible Heater Pad rests on an Herbal Pack;~~

an herbal pack in contact with said heater pad, said herbal pack ~~which is in turn retained in said contact~~ by a flexible Herbal Pack Retainer, said herbal pack retainer being made of a permeable material;

said herbal pack retainer adapted and built in such a way as to allow easy means for removal of the Herbal Pack from said herbal pack retainer, for a replenishment thereof, wherein, when the herbs inside the Herbal Pack are heated by said heat from said heater pad to a vaporizing temperature, until they ~~vaporize~~ emit vapors of herbal essence, said permeable material forming ~~said the~~ Herbal Pack Retainer ~~then will~~ allows the vaporized herbal essence to permeate through it and onto the skin and ~~at the same time absorb~~ concurrently, it absorbs part of the heat and helps to reduce the vapourizing temperature, ~~to a curie temperature.~~

2. (Currently Amended) A herbal applicator as claimed in Claim 1 wherein the flexible ~~main~~ housing is made up of two sections, a top member where ~~the~~ a strap means is located and a bottom member where the flexible heater pad is located, such that the top member ~~helps~~ provides means to prevent the heat generated from the heater pad from being dispersed to the outside of said housing and, whereas the bottom member ~~helps~~ provides means to contain the heat generated by the heater pad ~~within~~ between said bottom member and said herbal pack retainer to heat the herbs in said herbal pack effectively.

3. (Currently Amended) A herbal applicator as claimed in Claim 1 wherein the heater pad is affixed with ~~an~~ a first attachment means and a corresponding second attachment means is affixed on to the herbal ~~pad~~ pack retainer for a removable engagement to said first attachment means, ~~the said attachment~~ removable engagement providing means ~~is~~ to facilitate an easy removal and ~~attaching~~ replacement of the herbal pad.

4. (Currently Amended) A herbal applicator as claimed in Claim 3, wherein the first and second attachment means is hook and loop fabric ~~a set of velcro tape~~.

5. (Original) A herbal applicator as claimed in Claim 1, wherein the electrical source is a portable battery.

6. (Currently Amended) A herbal applicator as claimed in Claim 1, wherein the temperature control is for regulating the required temperature of the Heater Pad in order for it to maintain the vaporizing temperature at a temperature level below combustion but sufficient to cause ~~vaporize~~ the herbs contained in the Herbal Pack to emit said vapors of herbal essence.

7. (Currently Amended) A herbal applicator as claimed in Claim 1 wherein the flexible ~~Main~~ Housing is made of a flexible material, said flexible material providing means for said housing to that easily adapts to the contours of the body.

8. (Currently Amended) A method of administering herbs on to the skin of the body of a user by heating the herbs, until they vaporize, ~~is by using a devise~~ employing an apparatus having that comprises of comprising a flexible ~~Main~~ Housing, which can be easily attached on to the body of a user, and ~~affixed with~~ having a flexible Heater Pad that is connected to an electrical Power Source ~~to~~ and can be regulated to emit heat to reach a determined vaporizing temperature by an adjustable Temperature Controller, ~~with the~~ and having said flexible Heater Pad resting ~~on~~ in a communication with a Herbal Pack containing herbs, and ~~which is in turn retained by~~ having a flexible Herbal Pack Retainer adapted for an engagement to said housing and made of a permeable material and configured to retain said herbal pack in said communication when in said engagement and with said herbal pack retainer adapted to allow easy removal and replacement of the herbal pack and built in such a way as to allow easy removal of the Herbal Pack for a replenishment thereof, wherein comprising the steps of:

~~when the heating the~~ herbs inside the Herbal Pack ~~with said~~
~~heat to said temperature to cause a vaporized herbal essence to~~
~~be emitted from said herbs; are heated, until they vaporize, the~~
~~Herbal Pack Retainer then will~~

allowing the vaporized herbal essence to permeate through
the permeable material of said herbal pack retainer ~~it~~ and onto
the skin of said body; and

at the same time allowing said herbal pack retainer to
absorb part of the heat as a means to help ~~and helps to~~ reduce
the vapourizing temperature ~~to a curie temperature.~~
